FOREWORD

Welcome to the August 2024 monthly issue of *ROGER THAT*, your go-to resource for insights, updates, and analyses in the world of defence and military affairs. This magazine is crafted for defence aspirants, professionals, and enthusiasts alike, aiming to provide valuable knowledge across diverse sectors such as science and technology, arts, commerce, geography, aviation, sports, and defence.

Our mission is to empower readers with the latest developments and thought-provoking content that inspire, inform, and drive excellence in the defence community.

Thank you for joining us on this journey.

COVER STORY

INDIGENOUS DEVELOPMENT IN ARMED FORCES

ZORWAR LIGHT TANK

India has unveiled the 'Zorawar' light tank, developed jointly by DRDO and Larsen & Toubro, aimed at bolstering military capabilities in high-altitude environments. Designed within a record two-year timeframe, the tank features advanced weaponry and protection systems, including a 105mm rifled cannon and composite modular armor. Named after General Zorawar Singh, the tank is slated for extensive trials before potential deployment in Ladakh, Sikkim, or Kashmir

• Background and Purpose

- Designed to meet the specific operational requirements of the Indian Armed Forces.
- Named after General Zorawar Singh, a legendary military general from the 19th century.
- Developed to operate in high-altitude areas and difficult terrains, like the Northern and Eastern borders of India.

• Key Features and Capabilities

- Lightweight and agile to ensure mobility in mountainous and rugged terrains.
- Equipped with advanced weaponry and modern technology.
- Enhanced protection and survivability features.
- Capable of performing reconnaissance, infantry support, and engaging enemy armor.

• Development and Manufacturing

- A collaborative effort between Indian defense organizations and domestic industries.
- Involves contributions from the Defence Research and Development Organisation (DRDO) and private sector companies.
- Focus on utilizing indigenous materials and components to reduce dependency on foreign suppliers.

• Strategic Importance

- Enhances India's capability to defend and secure its borders, especially in high-altitude regions.
- Provides a strategic advantage in rapid deployment and response during conflicts or border tensions.
- Strengthens India's defense posture and self-reliance in military technology.

• Technological Innovations

- Incorporates state-of-the-art sensors, communication systems, and fire control systems.
- Designed to operate in extreme weather conditions, including snow, rain, and high-altitude environments.
- Features modular design for easy upgrades and maintenance.

• Operational Benefits

- Improves the maneuverability and operational readiness of the Indian Army.
- Enhances the ability to conduct swift and decisive operations in challenging terrains.
- Provides support to infantry and other ground forces with its versatile capabilities.

• Economic and Industrial Impact

- Promotes the growth of the indigenous defense manufacturing sector.
- Creates employment opportunities and boosts the local economy.
- Reduces the defense import bill and fosters technological innovation within the country.

• Future Prospects

- Potential for export to friendly nations, enhancing India's defense diplomacy.
- Continuous upgrades and improvements to meet evolving military needs and technological advancements.

“CELL FREE” 6G LOADING ?

SCIENCE AND TECHNOLOGY

India Advances 6G Technology Development with IITs Collaboration

India's Department of Telecommunications (DoT) said in July 2024 that it wanted to improve 6G technology that was already in the country. The project aims to create “Cell-Free” 6G Access Points by working with IIT Roorkee and IIT Mandi. This will help shape the future of mobile communication.

Objectives of the 6G Project

The 6G project's goals are to:

- Create entry points for radio access networks of the future.
- Contribute to making 6G technologies more uniform.
- Make things be sold and create intellectual property rights (IPRs).
- Prepare a skilled workforce for the changing business world.

Understanding 'Cell-Free' Massive MIMO

Cell-based design is how most mobile networks work. 'Cell-Free' Massive MIMO technology, on the other hand, uses many access points spread out in an area to work together. The following are some good things about this system: Connectivity everywhere, with fewer dead spots; stronger and more reliable signals; and much faster data speeds for users, especially in areas with lots of people. Overall, this project is a big step forward for improving India's communications and lays the groundwork for the 6G age that is coming soon.

About 6G telecommunications

The goal for 6G connectivity, which is expected to be available around 2030, is speeds of more than 100 Gbps. Terahertz frequencies will be used, allowing for very low delay of just 1 millisecond. Holographic contact and advanced IoT networks are two important uses. 6G could use network control that is driven by AI to work better. It could be used for new things, like remote surgeries and realistic augmented reality. 6G is also expected to improve connection around the world, filling in broadband gaps in rural areas. Sustainable infrastructure that has less of an effect on the environment is the subject of research.

GROUP DISCUSSION TOPIC

Humanity is moving towards the era of Artificial Intelligence and Machine Learning. In your opinion what is the biggest threat that AI/ML poses?

- Loss of Jobs
- Lack of emotions hampering originality
- uncontrolled and unregulated growth

GROUP DISCUSSION TOPIC

In your opinion what is the biggest threat to humanity?

- Artificial Intelligence
- weapons of mass destruction
- increasing carbon footprints

CURRENT AFFAIRS

ASSAM'S CHARAIDEO MOIDAM INCLUDED IN UNESCO WORLD HERITAGE LIST

The Charaideo Moidams, a unique 700-year old mound-burial system of the Ahom dynasty from Assam, was officially inscribed on the United Nations Educational, Scientific and Cultural Organization (UNESCO) World Heritage List on July 26 becoming the 43rd property from India to be included in the prestigious index

SOLDIER DEAD, ARMY MAJOR AMONG 4 INJURED IN ENCOUNTER IN J&K'S KUPWARA

The Indian Army foiled an attack by Pakistan's Border Action Team along the Line of Control in Kupwara. In the operation, one soldier died, while four others, including a Major rank officer, were injured. A Pakistani terrorist was also killed in the gunfight. Border Action Teams (BATs) which include commandos from the Pakistan Army and terrorists have been known for infiltration along the LoC in the past.

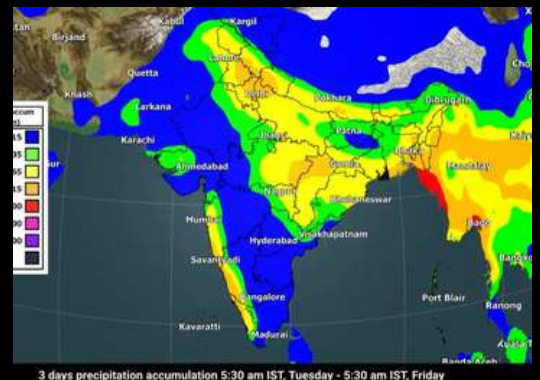

PAKISTAN-BASED TERROR GROUP LET BEHIND REASI TERROR ATTACK

Pakistan-based Lashkar-e-Tayyiba (LeT) is behind the Reasi terror attack in Jammu in which nine Hindu pilgrims enroute to Vaishno Devi were killed and another 33 injured after jihadists opened fire on the bus as a result of which the vehicle fell into a gorge. According to top official sources, the attack was carried out deliberately during the swearing-in ceremony of Modi 3.0 at Reasi and the perpetrators are around 12 jihadists moving inside the Rajouri-Poonch forests in groups of three or two in the Jammu region.

VERY HEAVY RAINS TO POUND JAMMU-KASHMIR, HIMACHAL, UTTARAKHAND THIS WEEK AS MONSOON INTENSIFIES

Until recently, hot and humid conditions prevailed over the Western Himalayan States. But as the monsoon trough began to expand its reach across even the northern-most regions of the country, the ongoing heat spell has broken by a barrage of torrential rainfall activity. According to the India Meteorological Department (IMD), widespread, moderate rains with thunderstorms and lightning have been forecast over Himachal Pradesh, Uttarakhand, Jammu-Kashmir and Ladakh until the end of this week.

Sports

Argentina Wins!

Argentina's road to a historic 16th Copa America title was a thrilling ride of emotions and drama, with Martinez delivering the knockout punch to Colombia in the final.

Know about All India Football Federation (AIFF)

Establishment and Affiliation

- Founded in 1937.
- Affiliated with FIFA since 1948.
- Member of the Asian Football Confederation (AFC).

Governing Body

- Responsible for overseeing football activities in India.
- Headquartered in Dwarka, New Delhi.
- Governed by an Executive Committee.

National Teams

- Manages both the men's and women's national football teams.

Key achievements:

- Men's team won the South Asian Football Federation (SAFF) Championship multiple times.
- Women's team has seen a rise in performance on the Asian stage..

Domestic Competitions

- Organizes major leagues and tournaments:
- Indian Super League (ISL)
- I-League
- Santosh Trophy
- Federation Cup

Development Programs

- Initiatives for grassroots development.
- Youth leagues and academies to nurture talent.
- Collaboration with international football clubs for technical support and training.

Challenges and Reforms

- Addressing issues like infrastructure, coaching, and grassroots development.
- Recent reforms to professionalize the sport and improve governance.
- Efforts to boost women's football and increase participation.

Vision and Future Goals

- Aim to qualify for the FIFA World Cup.
- Strengthen domestic leagues and improve the competitive environment.
- Enhance visibility and popularity of football in India.

"The AIFF continues to work towards elevating Indian football on the global stage, focusing on sustainable growth and long-term success"

PARIS OLYMPICS 2024

SWAPNIL KUSALE OF INDIA MAKES RIFLE FINAL; LOVLINA BORGOHAIN WINS OPENER

While Indian athletes did not feature in medal events on Wednesday, Swapnil Kusale delivered a noteworthy result at the Paris 2024 Olympics. The 28-year-old shooter advanced to the men's 50m 3 positions rifle final and has the opportunity to add to India's medal tally on Thursday..

CARLOS ALCARAZ-RAFAEL NADAL'S PARIS 2024 MEN'S DOUBLES TENNIS CAMPAIGN ENDS

Spain's Carlos Alcaraz and Rafael Nadal lost 6-2, 6-4 against fourth seeds Austin Krajicek and Rajeev Ram of the USA in the men's doubles quarter-final. Krajicek-Ram forced the Spanish duo to 26 errors at the Court Philippe-Chatrier on Wednesday. The Spaniards also made 17 unforced errors, resulting in their downfall in the last eight at the Paris 2024 Olympics

BOXING: NISHANT DEV DELIVERS BIG WIN ON OLYMPIC DEBUT

Indian boxer Nishant Dev upstaged seventh seed Jose Gabriel Rodriguez Tenorio of Ecuador 3:2 in the men's 71kg round of 16 bout at Paris 2024. On his Olympic debut, the two-time national champion Nishant Dev progressed to the quarter-finals and is one win away from bagging his first medal at the Summer Games.

PARIS OLYMPICS 2024

MANU BHAKAR BECOMES 1ST INDIAN WOMAN TO WIN 2 OLYMPIC MEDALS IN PARIS

First, she won bronze in the women's 10 metre air pistol event, becoming the first female shooter from India to win a medal at any Olympics. Next, she won another bronze medal in the mixed 10 metre air pistol team event, wherein she partnered with fellow team mate, Sarabjot Singh.

SARABJOT SINGH: FROM HOBBY SHOOTING TO MEDAL HARVEST

Sarabjot Singh, a 22-year-old shooter from a farming family in Haryana, won a bronze medal at his first Olympics. Initially introduced to shooting at a summer camp, he pursued his passion despite financial challenges. A former Junior World Champion, Sarabjot balanced his studies and sport, ultimately succeeding on the Olympic stage with perseverance and family support.

GROUP DISCUSSION TOPIC

India is the most populous country in the world. Despite this fact, the total number of athletes that participate in Olympics is less than most other countries in the world that have population lesser than India's population. In your opinion what is the single most important factor for scanty number of athletes representing India at athletics?

- Poor training infrastructure
- vendetta and politics
- craze for few specific sports.

OTHER COMPETITIONS

INDIAN SPORTS WRAP, JUNE 28: TVESA MALIK MAKES SOLID START IN SWISS LADIES OPEN 2024

India's Tvesa Malik got off to a solid start at the VP Bank Swiss Ladies Open as she carded 3-under 68 in the opening round of the Ladies European Tour event here. Though the first round was far from complete, Tvesa, who is making a comeback from indifferent form, had four birdies and one bogey at Golfpark Holzhausen.

BADMINTON ASIA JUNIOR CHAMPIONSHIPS: INDIA THRASHES VIETNAM 5-0 TO START CAMPAIGN IN STYLE

India began their Badminton Asia Junior Mixed Team Championships with a thumping 5-0 win over Vietnam in their Group C opener at Yogyakarta, Indonesia, on Friday. The mixed doubles combination of Bhargav Ram Arigela and Vennala K came back from a game down to beat Pham Van Truong and Bui Bich Phuong 17-21, 21-19, 21-17 to put India ahead.

AVANI CHITALE WINS AITA WOMEN'S TENNIS TOURNAMENT

Qualifier Avani Chitale gave herself a fairytale finish as she beat Kashish Bhatia 7-6(8), 6-0 in the final of the Rs.100,000 AITA women's tennis tournament at the SKIT Campus on Friday. It was a dominant fare from the 16-year-old Avani as she did not drop a set in the main draw, and did not drop a game in two matches of the qualifying event earlier.

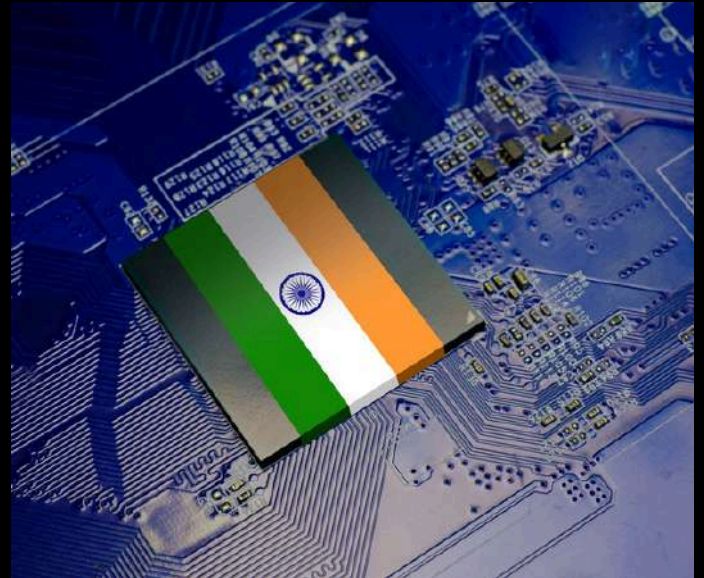

COMMERCE

BRICS' NEW TRADE STRATEGY

The BRICS nations—Brazil, Russia, India, China, and South Africa—are enhancing their economic collaboration with a new trade strategy aimed at reducing dependency on the U.S. dollar. This strategy includes establishing a common payment system and promoting bilateral trade in local currencies. The initiative seeks to strengthen economic ties among member countries, boost trade volume, and offer a counterbalance to Western financial dominance, potentially reshaping global economic power structures and fostering a more multipolar world economy.

India's Semiconductor Ambitions

India is ramping up efforts to become a global semiconductor manufacturing hub, investing \$10 billion in incentives for chipmakers. This move aims to reduce reliance on imports, enhance technological self-sufficiency, and secure supply chains amidst global chip shortages. The initiative includes establishing semiconductor fabrication units and fostering R&D, positioning India as a key player in the global tech landscape and boosting economic growth and job creation in the high-tech sector.

GROUP DISCUSSION TOPIC

These days reality shows are gaining popularity over other conventional TV serials and are followed widely. What in your opinion is the single most positive effect of these reality shows?

- Opportunity to budding talent
- Commercial benefit to the streaming service
- Promote cultural richness

GROUP DISCUSSION TOPIC

Now-a-days, craze for electronic gadgets has increased many fold in your opinion, these gadgets are having most negative effect on

- Health
- Education
- Socializing

Nirmala Sitharaman tables the

ECONOMIC SURVEY 2023-24

GLOBAL INFLATIONARY PRESSURES

As per April World Economic Outlook, in 2023, the global economic growth was 3.2% with diverging growth patterns emerging among countries due to domestic structural issues, uneven exposure to geopolitical conflicts and the impact of monetary policy tightening.

CONTROLLING RETAIL INFLATION

Inflationary pressures enhanced by global troubles, supply chain disruptions, and unpredictable monsoons have been managed well by administrative and monetary policy responses. This led to a decline in retail inflation to 5.4% from 6.7% in FY23.

JOBS & EMPLOYMENT

The survey said about one in two Indians are not yet readily employable, straight out of college, and the Indian economy needs to generate an average of about 78.5 lakh jobs annually until 2030 in the non-farm sector to cater to the rising workforce.

ON CHINA

India-China economic-relation dynamics continue to be "extremely complex and intertwined." The survey further noted that, "China's near-monopoly over the production and processing of critical and rare earth minerals has already been a cause of global concern. It will also have significant repercussions for India's renewable energy programme."

RENEWABLE ENERGY

India's renewable energy sector will attract investments of ₹30.5 lakh-crore by 2030 for meeting the target of having 500GW renewable energy in the country, as per the survey. This is because expanding renewable energy and clean fuels will increase land and water use, among other challenges.

INDIA'S ON A STABLE FOOTING

Despite many external challenges, the Indian economy maintained the momentum it gained from FY23 to FY24. Further, India has consolidated its post-Covid recovery with policies, both fiscal and monetary, ensuring economic and financial stability. Notably, India's real GDP grew by 8.2%, exceeding the 8% mark in 3/4 quarters of FY24.

RISING FOOD INFLATION

The survey highlighted that food inflation based on the Consumer Food Price Index (CFPI) increased from 3.8% in FY22 to 6.6% in FY23 to 7.5% in FY24—a 97% rise in two years. It attributed this increase to climate change that led to heat waves, uneven monsoons, unseasonal rainfall, hailstorms, torrential rainfall and historic dry conditions.

SECTOR-WISE EMPLOYMENT

While service sector remains one of the prominent job creators, the construction sector has also been creating more jobs.

Due to the legacy of bad loans, the manufacturing sector saw a subduction in jobs in the last decade. However, it has rebounded since 2021-22.

ENERGY NEEDS

There has been a significant increase in renewable energy capacity with non-fossil sources making up 45.4% of installed electricity generation capacity, as of May 2024. The government has taken various measures to support this transition. The demand is expected to grow 2-2.5 times by 2047 to support the country's goals.

THE EXTERNAL BALANCE

Due to subdued global demand for goods, the external balance has been pressured. However, strong exports of services largely counterbalanced this. The Current Account Deficit stood at 0.7% of GDP during FY24, an improvement from the deficit of 2% of GDP in FY23.

GEOPOLITICAL ANALYSIS

ISRAEL PALESTINE CONFLICT

THE FORMATION OF HAMAS WAS TRIGGERED BY THE ISRAELI OCCUPATION OF THE GAZA STRIP AND WEST BANK, THE FIRST INTIFADA, ISLAMIC REVIVAL, THE FAILURE OF SECULAR NATIONALISM, AND DIRE SOCIAL AND ECONOMIC CONDITIONS. FOUNDED BY AHMED YASSIN IN 1987, HAMAS EMERGED AS A MILITANT ISLAMIST MOVEMENT DEDICATED TO RESISTING ISRAELI OCCUPATION AND ESTABLISHING AN INDEPENDENT PALESTINIAN STATE.

WESTERN NAVIES STRUGGLE TO END HOUTHİ THREAT TO RED SEA SHIPPING

THE HOUTHİS HAVE INCREASED ATTACKS ON SHIPPING IN THE RED SEA, THREATENING GLOBAL MARITIME SECURITY. THEIR TACTICS INCLUDE USING DRONES AND MISSILES TO TARGET VESSELS, ESCALATING TENSIONS IN THE REGION. THESE ATTACKS HAVE SIGNIFICANT IMPLICATIONS FOR INTERNATIONAL TRADE ROUTES AND UNDERScore THE NEED FOR ENHANCED MARITIME DEFENSES TO ENSURE SAFE PASSAGE THROUGH THIS CRITICAL WATERWAY.

RUSSIA UKRAINE WAR

DURING THE LAST WEEK OF JULY, RUSSIA MOUNTED ITS LARGEST ASSAULTS IN EIGHT MONTHS IN EASTERN UKRAINE'S DONETSK REGION, SEIZING A STRING OF SETTLEMENTS IN AN APPARENT BID TO CUT OFF KEY SUPPLY ROUTES AND FORCE A MASS UKRAINIAN RETREAT.

AT THE SAME TIME, UKRAINE SCORED A HIGH NUMBER OF HITS ON RUSSIAN ENERGY INFRASTRUCTURE AND OCCUPIED CRIMEA, SUGGESTING THAT ITS STRATEGY OF DEGRADING RUSSIAN AIR DEFENCES IS WORKING.

GROUP DISCUSSION TOPIC

Another GD topic:-

In your opinion what is the biggest threat to humanity?

- Artificial Intelligence
- Weapons of mass destruction
- Increasing carbon footprint

Environment

Amazon Rainforest Tipping Point

Recent studies indicate the Amazon rainforest is approaching a critical tipping point due to deforestation and climate change. With deforestation rates hitting new highs, the world's largest rainforest risks transforming into a savannah, losing its ability to regulate global climate. This ecological disaster would have far-reaching impacts on biodiversity, weather patterns, and carbon storage, highlighting the urgent need for stringent conservation policies and international cooperation.

Arctic Meltdown: Climate Alarm

Recent data reveals the Arctic is warming nearly four times faster than the global average, leading to unprecedented ice melt and rising sea levels. This rapid change threatens polar ecosystems, indigenous communities, and global weather patterns. The accelerating loss of ice also amplifies global warming by reducing the Earth's albedo effect. This alarming trend underscores the urgent need for robust international climate policies and innovative solutions to mitigate the impacts of climate change.

Green Energy Revolution in India

India is accelerating its green energy transition with ambitious renewable energy projects, including massive solar and wind farms. The government aims to achieve 450 GW of renewable energy capacity by 2030, significantly reducing carbon emissions and reliance on fossil fuels. This shift towards sustainable energy not only addresses climate change but also positions India as a global leader in green technology, fostering economic growth and energy security in the process.

Nari Shakti: Women in the Armed Forces

The role of women in the armed forces has evolved from primarily non-combat roles to significant involvement in combat and leadership positions. Historically, women served in support roles during conflicts, with notable examples like the Women's Army Corps (WAC) in WWII and the Jhansi Regiment in India's fight for independence. Progressive changes have seen countries recognizing women's equal potential, fostering diversity, and enhancing operational effectiveness. Despite cultural and physical challenges, women's participation enriches the military's capabilities and reflects evolving societal values.

Colonel Anshu Jamwal has created history by becoming the first woman officer to lead an Air Defence Regiment.

CISM Climbing for Peace event, Lt Cdr Shristi Thakur, an accomplished mountaineer is proudly representing Indian Navy.

Proud moment as Team India with a six-member tri-services delegation (including 1 woman mountaineer) under the leadership of Everest and distinguished mountaineer Lt Colonel Manoj Joshi headed to the 3rd CISM Climbing for Peace event on Mt. National Affairs

Foreign ministry gets record Rs 22,154 crore in Union Budget 2024-25

The Ministry of External Affairs (MEA) has been allocated a record Rs 22,154 crore for the year 2024-25 in the Union Budget presented on July 23. With more than Rs 5,600 crore earmarked for foreign aid, the amount will be used to help fulfil India's 'Neighborhood First' policy while much of the remaining amount goes into the smooth functioning of diplomatic missions and welfare schemes abroad

J&K's Chenab Bridge, world's highest arch bridge, to host inaugural train on Aug 15

The long wait to witness train running on the world's highest rail bridge seems to be over as Indian Railways is gearing up for launching the regular service between Reasi and Sangaldan with efforts being undertaken to flag off the much-awaited service on August 15.

The launching of the service, part of the kashmir rail link project, entails a passenger can travel up to Baramulla in Kashmir from Reasi in Jammu, a significant achievement in the Udhampur-Srinagar-Baramulla Rail Link(USBRL) project.

A challenging project involving topographically, geologically and tectonically, the project with long tunnels and highest bridge is a testimony of make-in-india.

International Affairs

Modi, Japanese PM Kishida agree to advance infrastructure, cultural ties at G7 Summit

Strong ties between India and Japan are important for a peaceful, secure and prosperous Indo-Pacific, Prime Minister Narendra Modi has said as he met his Japanese counterpart Fumio Kishida in Italy where the two leaders expressed a wish to advance bilateral ties across various sectors. The Prime Minister, who was on a day-long visit to Apulia, southern Italy on June 14 to address the Outreach session on day two of the three-day G7 Summit, met Mr. Kishida after addressing the multilateral gathering on the topic of Artificial Intelligence, Energy, Africa and the Mediterranean.

Iran and Sweden carry out a prisoner swap, freeing man convicted of war crimes over 1988 executions

Iran and Sweden on Saturday carried out a prisoner swap that involves the release of Hamid Nouri, convicted of war crimes by Sweden over 1988 mass executions in the Islamic Republic, in exchange for a European Union diplomat and another man held by Tehran. Iran released Johan Floderus, a Swede who had been working for the EU's diplomatic corps, as well as a man identified as Saeed Azizi by Swedish Prime Minister Ulf Kristersson. They "are now on a plane home to Sweden, and will soon be reunited with their families," Kristersson wrote on the social platform

G7 Summit commits to promoting India-Middle East-Europe Economic Corridor

The Group of Seven (G7) industrialised nations have committed to promoting concrete infrastructure initiatives such as the India-Middle East-Europe Economic Corridor (IMEC) in the G7 Summit Communique issued at the end of the three-day G7 Summit, attended by Prime Minister Narendra Modi. The Communique was issued on June 14 after the customary "family photo" at the luxury resort of Borgo Egnazia, where the G7 also reiterated a commitment to a "free and open Indo-Pacific" based on the rule of law.

Modi, Sheikh Hasina hold extensive talks; India, Bangladesh ink pact to boost ties in maritime sphere, blue economy

Prime Minister Narendra Modi on June 22 held extensive talks with his visiting Bangladeshi counterpart Sheikh Hasina to shore up cooperation in diverse areas including trade and connectivity. The two leaders decided to expand cooperation in several new areas and inked a raft of agreements, including to boost ties in the maritime sphere and blue economy. The key pacts signed by the two sides included one on forging strong ties in the digital domain and another on having a "green partnership". The two sides also inked an agreement on railway connectivity..

ABOUT US

The Integrated SSB Virtuosos at CS Joint Services Academy (CSJSA) started on 04 July 2021 to guide Indian youth to become officers in the Armed Forces. At CSJSA, we mentor defense aspirants for excelling in the Services Selection Board (SSB) Testing procedure. Rooted in the ancient tradition of Manasa-Vacha-Karmana, our philosophy emphasizes aligning mind, speech, and actions for a balanced personality. We mentor students to achieve harmony in their mind, speech, and actions, believing this balance is crucial for success, including in the SSB. Our motto is to support and encourage students as a community, not just provide services. Our sessions focus on psychological aspects and the genesis of assessment at the Services Selection Board, aiming to enhance self-improvement methods. CSJSA strives to carve a niche so every young aspiring student can fulfill their dream of serving as an officer in the Armed Forces.

MEET OUR FOUNDER!

Lieutenant Commander Nikhil Kumar Chandrakala (Retd.)

- Youngest Group Testing Officer of India since 1947
- Ex 12 SSB, Bangalore
- Founding Team : SSB (Kolkata)
- Ex Warship Captain & Flag Lieutenant

MEET OUR CO-FOUNDER!

Commander Arun Mishra (Retd.)

- Navy veteran with 23 years of service
- Alumnus of NDA, IIT Kharagpur, and IIM Indore
- Awarded commendations by Chief of Naval Staff and C-in-C
- Served 8 years at Dakshana Foundation as Chief Academics Officer and CEO
- Successfully coached over 4000 underprivileged students for JEE and NEET, achieving a consistent 70% success rate
